

AlightForLife®

Low Level Fire Safety Light

AightForLife® - Designed for Life

AightForLife® - Designed to aid escape

	AightForLife®	Traditional Emergency Lighting
Comes on instantly when a fire alarm sounds	✓	✗
Can be clearly seen in smoke conditions	✓	✗
Last for up to 8 hours in power failure	✓	✗

AightForLife® - Feature and Benefits

- ❖ Installed at **low level** for clear visibility below the smoke threshold
- ❖ A directional LED light that **actuates by sensing the sound of smoke alarms**, or via a non sounding smoke head in communal parts of general needs buildings (stay put policy)
- ❖ Emergency light capabilities for up to eight hours, selectable drain down times can be set to avoid deep discharge on the battery
- ❖ Formed in flame retardant ABS for low flammability
- ❖ Switchable **daylight sensing** facility
- ❖ Built-in **Intelligent self test** facility with visible warning LEDs for easy maintenance
- ❖ The **directional LED** arrow can be set to flash, for example at a final exit
- ❖ Suitable for **surface and flush mounting** on walls and a variety of surfaces
- ❖ Back mounting plates and cages available for **building sites, plant rooms and heavy traffic areas**
- ❖ 110v option available, great for UK construction sites
- ❖ AightForLife® can be produced in any colour to suit the environment it is to be installed in
